Hiring Team
Tutridge
Perth, Australia

Dear Tutridge Hiring Team,

I saw on LinkedIn, through the NUST Placement Office, that Tutridge is hiring remote Computer Science teachers. I recently graduated with a BS in Computer Science from Virtual University of Pakistan, and I enjoy making difficult technical ideas feel intuitive.

As a student at Virtual University of Pakistan, I built a pipeline to publish my notes such that I could share my knowledge with other people. My friends, juniors and students from Bangladesh used it to expand their knowledge and prepare for their exams. Since 2022, I have been informally helping students from Pakistan, India, Bangladesh, United States and Egypt with different mathematics and computer science topics. My approach is to build intuition using visuals and personal experiences and then formalize into academic text.

My other projects include a raytracing engine which I later optimized through multi-threading, cutting rendering time from 30 minutes to 2-3 minutes and a maze game as my final year project, which taught me design patterns, layered architecture, Prim's and A* algorithm, menu navigation and engine design which can serve as live demos to teach the relevant topics.

With my technical background, love for my subjects and desire to share my passion with others, I am confident that I can help students build strong foundations. Thank you for your time and I am looking forward to hearing from you.

Sincerely,
Muhammad Zaid
